

Which Dodge Ram console do I need?

Step 1 – Do you have the old or new style dash?

Old style

New Style

Step 2 – Do you have a 4x4 shifter on the FLOOR?

Step 3 – Do you have old style floor brackets?

To determine, slide passenger front seat forward. Look at the inner passenger seat rail, from the back seat. Do you see the circled black metal bracket? If so, you have the old style brackets. If not, you have the “hidden” new style brackets.
